

Ever-Flo® External Filter Ridge Vent

Designed Better to Perform Better

Filtered ridge vents provide an effective method of exhausting damaging heat and moisture from under roof surfaces while providing optimum protection against insects and weather from entering the building. **However, not all filtered ridge vents are created equal.**

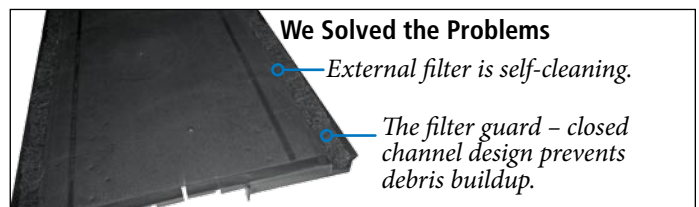

Competitive Products have Two Major Problems

1. Internal filter cannot be cleaned.
2. Open channel design collects twigs, pine needles and leaves.

Internal Filter Vents Clog from Internal Debris, Cannot be Cleaned

Conventional internal filters can become clogged over time with air dust particles that reduce, or completely stop airflow from under roof surfaces causing damage due to moisture and heat buildup. These types of internal filter vents cannot be cleaned economically.

We Solved the Problems

- External filter is self-cleaning.
- The filter guard – closed channel design prevents debris buildup.

Ever-Flo External Filter Vent is Self-Cleaning

Ever-Flo's patent-pending, external filter guard keeps weather and insects out of the building while assuring long-lasting ventilation performance. Rain water automatically passes through the filter and naturally cleans it, passing dust along the vent's channel and out of the drain holes. Should the filters ever become clogged, they can be easily replaced or removed and cleaned with a spray of water.

Protects Against External Debris Buildup

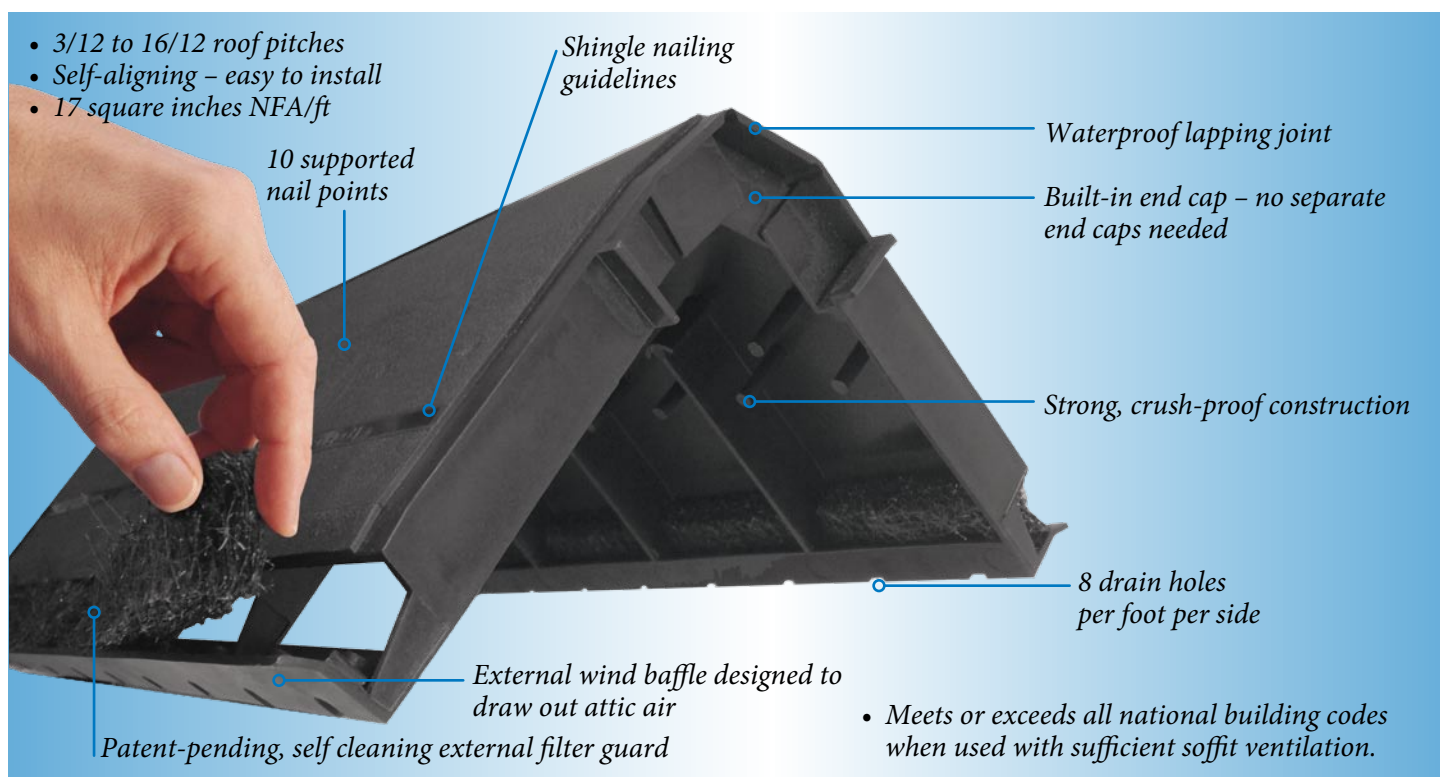

While conventional internal filter vents use an open channel design to exhaust heat and moisture, that channel can become clogged with twigs, leaves, pine needles and other debris. The advanced wind baffle design combined with the filter guard used in Ever-Flo's External Filter Ridge Vent eliminates this problem by providing a flat surface that allows debris to blow away.

Ever-Flo External Filter Ridge Vents – Peak Performance for Decades to Come.

Ever-Flo® External Filter Ridge Vent

Premium Features for Premium Performance

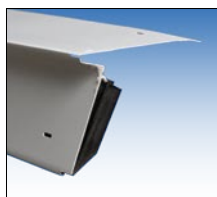

40-Year Warranty

The Ever-Flo External Filter Ridge Vent is backed by a 40-year limited warranty against defects that would impair performance.

Specifications

- Dimensions: 13" by 4' sections.
- Package: 12 pieces per carton, 48 linear feet.
- Weight: 28 lbs. per carton.

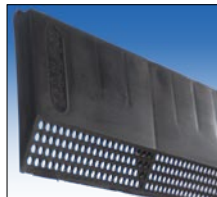

Accessory Ventilation Products from Ever-Flo to Maximize Performance

Ever-Flo Inhaler™ Soffit Intake Vent

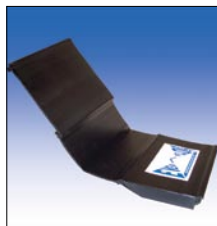

Two products in one – drip edge and soffit intake vent.

- Ideal for adding maximum air intake for narrow soffits.
- Installs on 3/12 to 12/12 roof pitches.
- Reduces ice back-up worries.
- Quick and easy installation.

Ever-Flo Versa Strips™

- Ideal for concealed soffit venting or for tile, metal and wood applications.
- Conceals/hides behind gutter board.
- No soffit overhang required.

Ever-Flo Vent Roof-to-Wall

- Ideal for venting shed roofs.
- Easily concealed behind vinyl siding or wood.
- Can be adapted for peak vent application.
